To the members of the Citizens Assembly on Electoral Reform: Greetings. I thank you for the incredible amount of work that you have already accomplished and for the "miles to go before you sleep" before you finish at the end of December.

In the light of electoral fairness I think that some sort of proportional representation should be implemented in our B.C. electoral system. In our inventiveness we have devised many weird and wonderful way to accomplish this. I don't know exactly which way to choose, only that it must be as simple and straight forward as possible. If it is not easily understood we will lose the very people that we are trying to involve in the balloting procedure.

I leave it to you, who by now must have a considerable amount of knowledge of the various options, to devise a system that will allow us to have the type of proportional representation that will reflect the needs of British Columbians.

Thank you again for your hard work. I hope it will pay off and you will go down in Canadian history as the vanguard for proportional representation in Canada.

All the best
